

INSIDE-THE-DOOR. HARDWIRED. SLEEK. POWERFUL.

Introducing, Nokē Ion

Nokē Ion is a hardwired smart locking system that is the latest addition in the award-winning line of Nokē Smart Entry products. Nokē Ion fits on the inside track of the door and boasts an innovative yet simplified design. This smart locking solution is low-voltage powered, can be customised with enhanced features like LED lights and motion sensors, and is designed and optimised for all Janus self-storage and commercial door products for both new construction and retrofits. Nokē Ion provides an enhanced customer experience while giving you the peace of mind that comes with knowing you are maximising your facility's security.

OPERATIONAL BENEFITS AT A GLANCE

- » Constant (low-voltage) power
- » Simplified, sleek, inside-the-door design for optimal security
- » Customisable enhancements to provide your ideal smart solution
- » Works with most standard Janus locks
- » Cloud-native software portal gives visibility into lock health, facility security, and customer behaviour
- » Automatic overlocking system (and release)
- » Robust manager mobile app makes operating facility easier than ever
- » 24/7/365 live support
- » Speed up move in process with truly contact-less rentals and move-ins for tenants

CUSTOMER BENEFITS AT A GLANCE

- » Customer-friendly mobile app for ease of access and entry (maximises convenience and control)
- » No keys to forget (eliminates lock cutting/drilling)
- » Digital key sharing
- » Fully automated rentals

Nokē Ion can also be retrofitted onto a non-Janus door product, however, compatibility must be verified, just like any other latch replacement.
