nokē infinitē
no key. no problem.
BY JANUS INTERNATIONAL

DUAL TECHNOLOGY. INFINITE FUNCTIONALITY.

Introducing, Nokē Infinitē

Nokē Infinitē is an on-door, dual technology, smart locking system that is the latest addition in the award-winning line of Nokē Smart Entry products. Nokē Infinitē combines the robust features of Bluetooth with the power harvesting capabilities of NFC, making it the first and only battery powered self storage smart lock that can be accessed even after the 5-year/45,000 cycle battery life. This next generation smart lock is optimized for retrofit installs. Nokē Infinitē has a superior antenna (4x stronger) than previous versions, making it the ideal lock ideal for retrofits.

OPERATIONAL BENEFITS

- Cloud-native software portal gives visibility into lock health, facility security, and customer behaviour
- Integrations with 20+ property management systems
- Compatible with Nokē smart keypads and smart entry devices
- Enables truly contactless rentals and move ins for tenants
- Digital key sharing for tenants
- Automatic overlocking system (and release)
- NFC provides redundancy for tenant access, providing more reliability than other on-door locks
- 24/7/365 live support
- Highest rated, most installed self storage access app (4.9 stars)

PRODUCT HIGHLIGHTS

5-YEAR BATTERY LIFE
(45,000 Cycles)

INFINITE ACCESS
via NFC Technology

4 X STRONGER SIGNAL
Built for realible connectivity

REQUIRES 50% LESS POWER
Draw for each lock

TAMPER RESISTANT DESIGN
Notified when event detected
